Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The documents cited in the search report are not considered to be of particular relevance to the invention.

A skilled person could not reasonably be expected to arrive at a mould assembly defined in claim 1 on the basis of the cited prior art documents.

The same consideration holds for the independent method claim 9.

Consequently, the subject matter of claim 1 is new and must be considered to involve an inventive step.

Dependent claims 2-8 and 10-11 define further embodiments of the invention and involve, therefore, an inventive step too.
